SAFUYIELD PROTOCOL

Deflationary token, multi chain yield aggregator, governance and staking protocol
SAFUYIELD PROTOCOL
Is a deflationary token, multi chain yield aggregator, governance and staking protocol

SafuYield Protocol decreases in total circulating supply every time a token transfer happens.

HOW?
After each transaction:

✓ SAFUYIELD distributes 2% fee automatically to all holders.
✓ SAFUYIELD distributes 2% fee to the SafuYield Protocol liquidity pool.
✓ SAFUYIELD distributes 2% fee to the “blackhole” address.

* The 2% fee is calculated as weighted distribution between all holders and the burn address and changing over time.

EXAMPLE
SAFUYIELD BSC token has a 2% reflect amount with each transaction.

TransactionAmount x 0.02 = DistributedAmount

Example sending 1000 SAFUYIELD

1000 x 0.02 = 980 SAFUYIELD

SMARTBURN
SAFUYIELD PROTOCOL

WHAT IS A “BLACKHOLE” ADDRESS?

50% of the total supply was sent to the black hole address at Genesis (Mainnet Launch):

0x000000000000000000000000000000000000dead – This is an inaccessible address, however it is also classified as a regular SafuYield Protocol token holder and receives a share of each transaction fee (2%), while doing that it reduces the circulating supply of SAFUYIELD tokens.

GENESIS AIRDROP

The Airdrop process is managed through the SafuYield Protocol smart contract.

Anyone can claim the Airdrop allocation after completing simple tasks and getting whitelisted.

The relevant functions on the smart contract are:

isWhitelisted(), addToWhitelist(), addToWhitelistMany(), hasClaimed() and claim().

GOVERN – SAFUDAO Protocol

Changes and the future direction will be managed by the SAFUDAO Governance Protocol app.

SafuYield Protocol holders can create proposals, vote and participate in the SAFUDAO Governance Protocol.

EARN

NFT Farming:

SafuYield Protocol holders will be able to join the NFT marketplace to create/trade/sell different non-fungible tokens.
SAFUYIELD PROTOCOL

Tokenomics (total supply one hundred trillion)

- AIRDROP 20%
- INITIAL LIQUIDITY LOCKED 20%
- PRIVATE SEED 5%
- EXCHANGE LISTING 5%
- "BLACKHOLE" ADDRESS 50%
